PROJECT

PetroSync

This project, R3Sys PetroSync, is a Petrol Pump Management System developed using Spring MVC, and MySQL. It enables admins to manage fuel types, prices, and staff records, while allowing registered staff to record daily fuel sales and generate receipts. The system ensures efficient tracking of fuel transactions, staff performance, and sales reporting in a streamlined digital platform.

Languages: HTML, CSS, JS, MySQL,Spring Framework
Platform: Eclipse

Twitter Sentiment Analysis Dashboard:

Developed an interactive Power BI dashboard using cleaned Twitter sentiment data related to gaming and tech companies. Designed visualizations to display positive, negative, and neutral sentiment trends, comparisons across companies, and engagement metrics. The dashboard provides clear insights into public sentiment and supports data-driven decision-making.

Tools & Technologies: Power BI
Platform: Power BI Desktop
