PROFESSIONAL OBJECTIVE

Enthusiastic and results-driven Entry-Level Software Developer with hands-on experience in Java, Python, Spring Boot, Flask, MySQL, and AI/NLP solutions (RAG). Skilled in building full-stack web applications and AI-powered conversational tools. Seeking an entry-level software engineering role to apply technical problem-solving and contribute effectively to team success.

TECHNICAL SKILLS

- **Languages:** Java, Python, SQL
- **Web Technologies & Frameworks:** HTML, CSS, JavaScript , Spring Boot
- **Databases:** MySQL
- **Platforms & Tools:** Visual Studio Code, Eclipse, IntelliJ IDEA, Jupyter Notebook, MySQL Workbench, Xampp

KEY PROJECTS

1. Student Enquiry Chatbot using RAG | *Python, Flask, NLP, RAG*

- Engineered an AI-powered conversational agent using RAG and NLP to provide accurate, real-time, and context-aware responses to student queries while streamlining information access and reducing manual support.
- Implemented a Flask-based RESTful API pipeline to efficiently process user queries, retrieve relevant information, and seamlessly handle prompt processing and response generation.

2. Resume-Based Interview Preparation Platform | *Java, Spring Boot, HTML, CSS, MySQL*

- Developed a full-stack web application to parse candidate resumes, extract core skills, identify qualification gaps, and provide automated mock interview evaluation with performance scoring and personalized learning recommendations.
- Designed structured MySQL database schemas and developed robust RESTful backend services using Spring Boot to efficiently manage resume data, interview results, skills, and learning recommendations.
